

FEATURES

- Hand-held cartridge Filter
- Direct-fill your glass or bottle
- Easy cartridge replacement
- Cartridge treats 125 Liters or about 1 month,
- Four treatment functions,
- Sediment, taste & odor,
- Softened water to refill and protect your appliances,
- Bacteriostatic carbon media
- Designed for easy to use and clean...
- Made with BPA free materials

BENEFITS

- Cost conscious design,
- Affordable & money saving,
- Eliminates the need for buying bottled water,
- Broad variety of applications and uses at home or on the go.
- Puts an end to the environmental impacts of bottled water,
- Multimedia concept provides one solution for most water issues.
- Protects home appliances,
- Long-lasting dishwasher friendly filter housing,
- Safe and easy to use.

APPLICATIONS

- Home / Point of Use
- On-the-go refill water bottles
- Travel / Hiking / Exploring
- Marine / Camping / R&V
- Coffee, Tea & Ice making
- Baby beverage preparation

Silver impregnated GAC Filtration + Cation exchange resin

- Turbidity
- Taste & odor
- Water softening
- Heavy metals
- Bacteriostatic

What is Owell?

Owell™ the water filter is a hand-held water filter that anyone can use to improve tap water. Its' advanced filtration technology includes four main improvement functions: Mechanical filtration, chemical adsorption, ion exchange and a bacteriostatic effect.

In many regions of the world tap water, although conform with local drinking water quality standards, has unpleasant taste and odor, due to dissolved chemical residues such as chlorine or bromine. Tap water can also contain visible and less visible impurities that are suspended in the water stream. Dissolved contaminants, such as hardness, become only visible once in contact with air and when heated, to form difficult to remove calcium carbonate hardness deposits on your faucet, water boilers, cooking pots and inside your water heating appliances. **Owell™ the water filter** will remove the tastes and odors by adsorbing the dissolved chemicals on its huge granular carbon media surface. The ion exchange resin incorporated into the **Owell™ the water filter** cartridge will attract and hold hardness forming ions to soften the water and protect your kitchen appliances, keeping them free of hardness deposits. To prevent contamination inside the filter media, we use treated the media with a silver-ion based technology known for its anti-microbial effects. The simple design of **Owell™ the water filter** and its easy to change replacement cartridge make it your best friend at home, in your kitchen, to fill your coffee machine or teapot, but also when on-the-go to refill your water bottle, or just want to take a sip from a tap.

Turn tap water into great water with Owell the water filter.

Owell Product Information

Art. Nr	Product	EAN Code Outer carton	EAN Code Product
1095	Owell holder + 1 cartridge	8717729800409	8717729800386
1090	Owell 3 Cartridges	8717729800461	8717729800447
Packaging and instructions (included) in English, French and Spanish			

Packaging, Weight and Dimensions

Art. Nr	Outer Cartons	Dimensions	Weight
1095	Owell Holder + 1 cart.	9,5 x 9,5 x 15 cm	
1090	Owell 3 Cartridges	9 x 9 x 12,5 cm	
1095	6 Crt x 12 pcs = 72 pcs	62 x 41 x 50 cm	Net 10,50 Kg / Gross 15,30 Kg
1090	6 Crt x 12 pcs = 72 pcs	62 x 41 x 45 cm	Net 11,45 Kg / Gross 15,95 Kg
Call	On pallets of 864 pcs each		

Customs Identifications

Art. Nr	HS Code	Country of Origin
1095	8421.21.0090	The Netherlands
1090	8421.21.0090	The Netherlands

Product Material Certifications

Product	Material Specifications
Holder	Tritan, BPA Free
Cartridge	Polypropylen
Cartridge Media	NSF Standard 41 certified
	Manufacturing Certification
Holder	Produced under ISO 9001-2015 - BPA and Phalate free
Cartridge	Produced under ISO 9001-2015 - Phalate free
Other certifications	RoHS
